

Cabezas Irma Elena.Pintado Marta.
Producto Bruto Geográfico de la Provincia de Jujuy
CFI. Noviembre 1998.

Se presenta el cálculo del Producto Bruto Geográfico de la Provincia de Jujuy para la totalidad de las grandes divisiones (Agricultura, Silvicultura y Pesca, Minas y Canteras, Industria Manufacturera, Electricidad, Gas y Agua, Construcción, Comercio, Restaurantes y Hoteles, Transporte y Comunicaciones, Bancos, Seguros e Inmuebles, Servicios Comunales, Sociales y Personales, Total Producto Bruto).El nuevo cálculo comprendió el período 1994-1996 y está realizado a precios constantes de 1986 a efectos de posibilitar la continuidad de la serie histórica 1980-93.Las autoras del trabajo presentan los datos empalmados 1980-1996.Para cada gran división se presenta el cálculo desagregado a nivel de producto o subsector .Además de lo anterior se presentan los datos del Producto a precios corrientes de 1993, la que pasará en lo sucesivo a ser la nueva base de cálculo del PBG a precios constantes.

PROVINCIA DE JUJUY

PRODUCTO BRUTO GEOGRAFICO

ESTIMACION A PRECIOS CONSTANTES BASE 1986.
EXPRESADA EN MILES DE AUSTRALES.

PROVINCIA DE JUJUY.

PRODUCTO BRUTO GEOGRAFICO A PRECIOS CONSTANTES BASE 1990.

PRINCIPALES CONCLUSIONES.

El Producto Bruto Geográfico es un indicador del nivel y evolución de la actividad económica de la Provincia y puede definirse como "el valor, neto de consumo intermedio, de los bienes y servicios producidos durante el año por unidades económicas ubicadas dentro de los límites geográficos de la Provincia".

Evolución de la actividad económica:

1) Década del '80:

En la década del '80, el Producto Bruto Geográfico Provincial creció un 8.13 %, equivalente a una tasa de crecimiento media anual del 0.79%.

Los sectores que impulsaron este crecimiento son principalmente: Electricidad, Gas y Agua; Servicios Sociales Comunes y Personales; Transporte, Almacenamiento y Comunicaciones; y en menor medida el Sector Comercio y Restaurantes y Hoteles; y Agricultura, Ganadería y Silvicultura.

El primero de los sectores mencionados (Electricidad, Gas y Agua) creció un 130.51%. Dicho incremento se origina en el aumento de la cantidad de energía generada y distribuida, como a similar comportamiento en la cantidad de agua tratada para el servicio de provisión de agua potable y servicios cloacales.

El sector Servicios Sociales, Comunes y Personales creció un 66.66%. Este crecimiento está influenciado por el incremento verificado en el sector público provincial motivado en el incremento en la planta de personal. Por su parte, el sector privado creció un 42.90%.

Con relación al sector Transporte, Almacenamiento y Comunicaciones, se observa un incremento del 29.14% determinado fundamentalmente por el crecimiento verificado en el sector comunicaciones.

También contribuyen, aunque en menor medida, al crecimiento del Producto Bruto Geográfico en la década '80-'90, el sector Comercio y Restaurantes y Hoteles con un incremento del 6.42%; y el sector Agricultura, Ganadería y Silvicultura que muestran un incremento del 4.24%.

2) Periodo 1990-1996:

A partir del año 1991, se implementaron en el país una serie de reformas (privatización de servicios públicos, apertura del comercio internacional, implementación de un sistema de convertibilidad de la moneda, desregulación de vastos sectores sujetos a control estatal, etc.) que provocaron verdaderos cambios en el régimen económico.

En este nuevo marco, el Producto Bruto Geográfico de la Provincia de Jujuy creció un 7.05% entre 1990 y 1996. Este crecimiento es equivalente a una tasa media anual del 1.17%, sensiblemente mayor que en la década del '80.

El comportamiento descrito fue impulsado fundamentalmente por el sector Establecimientos Financieros y Seguros, Bienes Inmuebles y Servicios a las Empresas; nuevamente el sector Transporte, Almacenamiento y Comunicaciones y en menor medida el sector de provisión de Electricidad, Gas y Agua; Comercio y Restaurantes y Hoteles; el sector Agricultura, Ganadería y Silvicultura; y las Industrias Manufactureras.

Sector Establecimientos Financieros y Seguros, Bienes Inmuebles y Servicios a las Empresas: muestra un crecimiento del 107.08%. La actividad bancaria y aseguradora repuntan en consonancia con la estabilidad de los precios, acompañado por el crecimiento verificado en el sector Servicios a las Empresas y Bienes Inmuebles.

Nuevamente el sector Transporte, Almacenamiento y Comunicaciones ayuda al impulso verificado en el Producto Bruto Geográfico Provincial con un crecimiento del 58.03% originado principalmente en el incremento del sector Comunicaciones.

Con relación a los sectores que, aunque en menor medida, contribuyen al crecimiento verificado en el nivel de actividad económica provincial en el periodo 1990-1996, cabe mencionar los sectores de: Provisión de Electricidad, Gas y Agua que experimentó un crecimiento del 14.37%; Comercio Mayorista, Minorista y Restaurantes y Hoteles con un crecimiento del 12.78%; Agricultura, Ganadería y Silvicultura con un incremento del 11.80% y finalmente las Industrias Manufactureras con un crecimiento del 3.87%.
