***“El Efecto de las Asimetrías en el
Mercosur sobre la Provincia de
Buenos Aires”***

Informe de avance:

Etapa I: Recopilación bibliográfica y construcción de
Bases de Datos

16 de Julio de 2006

Realizado por: Instituto de Estudios Fiscales y Económicos (IEFE)
La Plata – Buenos Aires - Argentina

El presente es el informe de avance del Proyecto "El efecto de las Asimetrías en el MERCOSUR sobre la Provincia de Buenos Aires". En el mismo se dará cuenta de los avances realizados en las labores previstas para la primera etapa. Tal como se planteo en el plan de trabajo, durante la primer parte se ha efectuado una exhaustiva recopilación bibliográfica y se ha avanzado en la recolección de datos para la construcción de las bases necesarias para contrastar las hipótesis generales y particulares, sin descuidar por supuesto la articulación de los aspectos teóricos del estudio.

En este trabajo se busca realizar un diagnóstico del efecto de las asimetrías en el Mercosur sobre la estructura comercial y productiva de la Provincia de Buenos Aires considerando al comercio exterior como indicador de la capacidad de inserción de los sectores productivos. En este marco, se debe considerar que la estructura de las estadísticas de nuestro país no cuenta con datos de importaciones por provincias, de modo que en el presente trabajo se utilizará una metodología de detección de sectores sensibles a nivel nacional, para luego evaluar el impacto observado en las exportaciones (único dato de comercio exterior disponible a nivel federal), este es un ejercicio que se puede realizar en tanto y en cuanto la Provincia de Buenos Aires representa en promedio el 35% del producto nacional. El impacto final sobre la estructura productiva estará, por supuesto, ponderado por la importancia que tienen los sectores que se han determinado como sensibles en la economía bonaerense.

En función de esta tarea es que se debe realizar una profunda investigación de información y bibliografía que permita caracterizar asimetrías y luego cuantificarlas.

Aspectos Teóricos

En lo teórico se ha avanzado en la definición del concepto de asimetrías. Situación que, en forma particular, llevó a poner bajo consideración una definición del concepto no tradicional. Así, además de las asimetrías estructurales y de políticas se suma una nueva esfera asociada como son las asimetrías de origen macroeconómico.

Una etapa relevante y que se transforma en el argumento central de este estudio es la de determinar la importancia que tienen las asimetrías en los procesos de integración. Discernir que asimetrías generan comercio y que asimetrías generan efectos nocivos sobre la marcha de los procesos de integración es una tarea que requiere apoyarse en diferentes modelos teóricos que caracterizan a la economía internacional. Diferentes serán los resultados si modelamos la economía bajo preceptos clásicos como los que originan el modelo de Heckscher-Ohlin que si la modelización se realiza utilizando supuestos de la Nueva Economía Internacional. El tipo de comercio que se genere no es una cuestión que deba considerarse menor, la diferencia entre un proceso de integración exitoso y otro que no avanza puede estar dada por la presencia o ausencia de comercio intraindustrial (CII). Así, la revisión de la bibliografía y la metodología de trabajo apunta verificar la presencia de comercio intraindustrial como indicador del éxito del acuerdo de integración regional (AIR).

El análisis utilizando herramental empírico, fundamentalmente econométrico, se basará en el desarrollo de ecuaciones gravitacionales, en las cuales conceptos como la distancia económica, la distancia geográfica y la distancia arancelaria son variables fundamentales.

Recopilación Bibliográfica

La recopilación bibliográfica abarca la búsqueda de material que permita caracterizar las asimetrías de política, tanto en lo que hace a la cuestión tributaria como a la financiera y, fundamentalmente, en lo que hace a los incentivos a la inversión. Esta búsqueda incluye tanto cuestiones nacionales como subnacionales. Se trabajará para confirmar la hipótesis de que los Estados de Brasil han mantenido importantes asimetrías (en este caso de políticas públicas) que han redundado en su propio provecho.

En lo que respecta a las recomendaciones de política económica, es fundamental la experiencia internacional. De este modo, la experiencia europea será una suerte de espejo a la hora de evaluar medidas tendientes a reducir asimetrías y promover la convergencia en los países que abordan un proceso de integración, sin que esto implique desconocer las especificidades de cada proceso de en particular.

A fin de alcanzar los objetivos planteados, se ha recurrido a distintas fuentes. Entre ellas podemos destacar dos grandes grupos, por un lado, se ha recurrido a la búsqueda en Bibliotecas físicas o convencionales y por otro se ha realizado una búsqueda del material bibliográfico digital disponible en Internet. A tal fin se procedió a identificar los sitios de distintas instituciones que se ocupan de los temas que nos atañen. Estos son: www.iadb.org/intal/ del Instituto para la Integración de América Latina y el Caribe (INTAL), www.eclac.org de la Comisión Económica para América Latina y el Caribe (CEPAL), www.iadb.org del Banco Interamericano de Desarrollo (BID), cei.mrecic.gov.ar del Centro de Economía Internacional (CEI), www.repec.org del Research Papers in Economics (RePEc), www.imf.org del Fondo Monetario Internacional (FMI), www.finame.com.br del Ministerio do Desenvolvimento, Indústria e Comércio Exterior do Brasil, www.bndes.gov.br del Banco Nacional de Desenvolvimento Econômico e Social (BNDES), www.brasiltradenet.gov.br del Departamento de Promoção Comercial del Ministerio das Relações Exteriores do Brasil, www.ipea.gov.br/ del Instituto de Pesquisa Econômica Aplicada (IPEA), www.ibge.gov.br del Instituto Brasileiro de Geografia e Estatística (IBGE), www.ine.gub.uy del Instituto Nacional de Estadísticas del Uruguay, www.dgeec.gov.py de la Dirección General de Estadísticas encuestas y Censos de Paraguay, www.unctad.org de la Conferencia de las Naciones Unidas sobre Comercio y Desarrollo (UNCTAD) y www.worldbank.org del Banco Mundial.

Datos relevados

La recopilación de las bases de datos es una etapa fundamental, tanto para la caracterización y relevamiento de las asimetrías como para la realización del análisis

del impacto de las asimetrías sobre el comercio de la Argentina y de la Provincia de Buenos Aires.

Dentro de la recopilación de datos se recavó información de Cuentas Nacionales y demográfica, a fin de cuantificar tanto la distancia económica de los países y la posición de la Provincia de Buenos Aires en esta materia, como el comportamiento de los ciclos económicos. La necesidad que la información referida a países sea homogénea fuerza a que deba buscársela primeramente en organismos internacionales como son el Banco Mundial o el Fondo Monetario Internacional y luego si no se encuentra en esos ámbitos recurrir a fuentes nacionales, procurando realizar una tarea de homogeneización.

En cuanto a la información de comercio exterior, se necesita conocer tanto en forma agregada como desagregada. La información agregada nos permite caracterizar asimetrías macroeconómicas, como ser coeficientes de apertura, dependencia exportadora respecto al bloque y concentración de las exportaciones. La información desagregada es elemental para evaluar el impacto del proceso de integración sobre el patrón comercial, sobre la sensibilidad de los sectores y es también insumo de las regresiones econométricas. En cuanto al origen de los datos, las exportaciones desagregadas se han obtenido de la base WITS (World Integrated Trade Solution) del Banco Mundial basada en la base COMTRADE (Commodity Trade Statistics database) de las Naciones Unidas, esto asegura un alto grado de homogeneidad que permite análisis consistente tanto entre países como a lo largo del tiempo. A fin de asegurar un amplio rango de datos temporales se ha optado por trabajar con una Clasificación Uniforme para el Comercio Internacional Revisión 2 (CUCI-2).

En lo que respecta a las exportaciones provinciales la única de las fuentes disponible es la del Instituto Nacional de Estadísticas y Censos (INDEC). Cabe destacar que la información 2000-2005 se consiguió directamente en formato CUCI-2, en tanto que los datos correspondientes al período 1990-1999 están expresados en base al Sistema Armonizado a 6 dígitos, por simplificación se ha presentado a 2 dígitos de este sistema, pero se está procediendo a realizar la transformación correspondiente al sistema CUCI-2 de forma tal de homogeneizar los datos para que los mismos sean comparables a lo largo del período.

Considerando que la Inversión Extranjera Directa (IED) es al mismo tiempo causa y resultado de las asimetrías, su evaluación es fundamental para evaluar el impacto

que estas tienen sobre la estructura productiva. La intención de evaluar el comportamiento de la IED es determinar tanto a nivel agregado como a nivel sectorial, cual ha sido el impacto del proceso de integración en la recepción de inversiones por parte de los países que integran el MERCOSUR. El origen de estos datos es la Comisión Económica para América Latina y el Caribe (CEPAL).

Bases de Datos Recopiladas y Construidas

Exportaciones Intra MERCOSUR en millones de dólares corrientes,. Esta base se rige según la Clasificación Uniforme para el Comercio Internacional Revisión 2 (CUCI-2) . Fuente: World Integrated Trade Solution del Banco Mundial basada en la base COMTRADE (Commodity Trade Statistics database) de las Naciones Unidas. La información está disponible para el período 1986-2004 para los cuatro países, y se cuenta con el año 2005 para la Argentina y Brasil con fuentes nacionales.

Exportaciones de la Provincia de Buenos Aires en millones de dólares corrientes discriminando por países integrantes del MERCOSUR, para el período 1990-1999. Esta base se rige según el Sistema Armonizado y como se explico anteriormente, se cuenta con la información a seis dígitos para efectuar la transformación de los datos en base la Clasificación Uniforme para el Comercio Internacional (CUCI). Fuente: Instituto Nacional de Estadísticas y Censos (INDEC).

Exportaciones de la Provincia de Buenos Aires en millones de dólares corrientes a los países integrantes del MERCOSUR, para el período 2000-2005. Esta base se rige según la Clasificación Uniforme para el Comercio Internacional (CUCI). Fuente: Instituto Nacional de Estadísticas y Censos (INDEC).

Análisis de los flujos de Inversión Extranjera Directa (IED) en el Mundo en millones de dólares corrientes, con discriminación según destino, atendiendo a los países integrantes del MERCOSUR, América Latina y el Caribe y Países en Desarrollo para el período 1983-2005. Fuente: Comisión Económica para América Latina y el Caribe (CEPAL).
